Presurvey

This survey is intended to provide background context on your past experience with visualizations and with thinking in higher dimensions.

Your answers to this survey will not effect your participation in this research in any way.

* Indicates required question

1. What experiences have you had thinking about higher dimensional space? (four or more spatial dimensions) Please list each major instance. *

   E.g. "Once as a casual thought experiment", "Regularly as a part of a mathematics class"

2. In your life, how many **hours** would you estimate you have spent thinking about higher dimensional space in total? *

3. What experiences have you had thinking about designing data visualizations? Please list each major instance. *

   PLEASE NOTE: this question pertains to designing or studying visualizations, not utilizing existing visualizations.

   E.g. "I took a class on topographical data visualization techniques", "I built a custom data visualizer for measuring the health of bacterial cultures"

4. In your life, how many **hours** would you estimate you have spent thinking about visualization techniques? *

5. What visualization techniques for representing higher dimensional geometry are you familiar with? *
